

Social Economic Development of Women through Innovation in Learning

Arti Pathak^{1*}

ABSTRACT

The meaning of education is the search for truth, the search for the ultimate truth; innovation is a new idea, a new practice, that the new idea and new behavior of education will make the use of education simple, practical, interesting, functional and relevant. Creating is innovation. In modern times, there is a need for innovation in the education system for the social economic development of women, only then positive social economic development in women is possible. Innovation in the teaching method depends on the teachers. Innovative learning through teacher innovation by not changing the methods and method of teaching, girls can make them aware of their skills and talents. By using innovation in women's education, the current value of the traditional education system has been changed according to the environment. Innovation in education can remove many evils of the Indian society by educating the women's mind like: - Dowry system, female child abuse and harassment at workplace.

Keywords: *Innovation, Education, Social, Economic, Development.*

The word innovation is made up of the words, innovation, new means new or innovative and char Means conduct or behavior. In this way innovation is that change, by infusing innovation in previously existing methods and Materials, etc. Under innovation, some new and useful field is adopted, change in every single object or action. Havana is the law of nature, and development is possible only through change, education Is a powerful force for social change?

Along with being the means, the society is also the axis of economic development of the nation and the world, women are the mainstay element of the nation's formation and in their hands the family Is the main means of building the society and nation?

The more active, effective, resourceful, committed and efficient a woman will be, the more our Society, the nation and the country, will be in the path of development. According to Garnet Vail Maharaja, "Innovation is the idea that qualitative process brings about change. Innovations in women's education have been used to improve the present educational socioeconomic conditions. Innovation in Women's Education The development of

Social Economic Development of Women through Innovation in Learning

educational standards in our India and the revitalization and strengthening of the teaching system is a powerful tool for sustainable development. In such a situation it is very important that we keep our youth they are safe in providing quality innovated and skillful education of the women generation. There are some issues which require immediate attention to improve the quality of teacher education programmers.

Importance of Social Economic Development

In the present society, women of India participate in the fields of education, politics, media, art and Culture, service science and technology etc. In order to develop a nation in the situation of competition and development, there is a need for Innovative changes in teaching, integrated teaching, teaching curriculum and teacher education Training. To strengthen education, first of all, new knowledge and skills of teachers should come, it is Necessary to be proficient in the knowledge of teaching methods, technical research and innovation and their practical use, in new educational situations, the teacher's own new way to establish Relations with the students It is necessary to have knowledge of the field.

Today is the era of video, internet, broadcast, learners can learn very easily through these interactive Media, so the current value of the teacher will have to keep itself consistent with technology. Learning is continuous and there is continuous development in it. An experienced or qualified Teacher should be able to make the curriculum interesting and accessible by discovering his own Area, teacher education is limited to textbooks only. There is no limit, rather it gives such Instructions to the learner so that he can get the information from the information and apply himself According to the required tasks.

By adopting the field of innovation in teacher education, not only the curriculum is being complemented, but continuous efforts are being made to achieve success in future challenges and competition. Build and conduct experiments that provide opportunities to learn by doing and to learn through practice and to absorb direct experiences. With the aim of innovation in education, in the current scale, in the program of teacher training some impressive changes have not been made by the National Council for Teacher Education Regulations-2014, such as Bachelor of Education (V. Ed) in two-year teacher training program.

Innovation in Women Education

Master's degree (M.M.) in Education. Ed. Bachelor of Physical Education (B.Ed.) Field in Physical Education (M.A.Ed.) and Three Years Integrated B. Ed.M. Four Years Integrated VA-B. Ed, B.Sc. B. Ed and Bled. Ed courses etc. In the form of innovation, various types of teaching styles have been introduced in the form of Micro-teaching - forestry program, community services section teaching, practice program based on Self-study, etc., language knowledge in the new curriculum with theoretical part. The study and Conduct of the latest activities such as drama and art are the innovation in the field of study and repatriation, the field program of the prescribed curriculum, assessment of life-style learning, computer education, literary and cultural programs, debates, panel discussions, or group education, Health related activities etc., practical group learning, how to learn, when to learn and what new assessment tools are given to assess learning achievements with learning Is The reality and practicality of teacher education, the success of their implementation is possible only by the discovery of innovation, innovation leads to the development of mental brainstorming, the use of innovation leads to a democratic environment in the classroom and Opportunities are given to keep more knowledgeable people active. The use of innovation in teacher education gives an opportunity to solve many difficulties.

Social Economic Development of Women through Innovation in Learning

The need for innovation in women's education - In order to empower the women's field in India, first of all, it is necessary to kill all those monstrous attitudes in the society, which kill the values of their rights, such as - Sexual violence, illiteracy, or feticide, inequality, discrimination against women, child labor, adultery, human trafficking and other such topics, gender discrimination in the national social economy in the nation, etc. Brings the educational gap which leads the country backwards, some bad trends against women will be brought out in open debate and removed by the great Indian people, who have helped Indian women. Raised his voice for the nefarious actions against, as the relentless efforts of Raja Ram Maher Na Ray ended the Hisami practice.

Later on, other Indian social reformers, Archery VI nova Behaved, Ishtar Chandra Veda Sager Swami, Vivek Kendra, Mahatma Jyotirao Phule and Savitribai Phule, etc., raised their voice for the Development of women and fought hard. Ishtar Chandra Vidyasagar started the Remarriage of Widow Act in 1856 with constant efforts to improve the condition of the widows in India. To make the dream of women's development come true, there is a need to publicize the importance of girls and their education. Some Acts have been given by the Parliament to develop women with legal rights; those women's Rights will have to be developed by educating them by making them aware of the Act. The following are the Act of Rights. Have the following rights,

1. Immoral Traffic (Prevention) (1956).
2. Countryside Act 1961.
3. Equal Remuneration Act 1976.
4. Medical Termination of Progress Act 1987.
5. Sex Testing Techniques Act 1994.
6. Child Marriage Prevention Act 2006.
7. Education of Women at Workplace Act 2013.

Teachers are that part of the society which can bring about change through education. School and Teachers both take influence from our environment, teacher training is a deep relation in the Education of a school, they also influence each other, and effective teacher training is the issue of quality in school education. Ensures, a teacher works in broad context in education like: - Objective Curriculum, Curriculum Material Methods etc. The teacher should understand not only the knowledge of teacher methods, but also the knowledge of the socio-economic environment of the girl child and the process of learning, the need for innovation in teacher education to enhance the competence and quality of teachers. Realized, the Need for innovation in women's education is seen in the following context.

1. To make women's education with a time relatable change.
2. To improve the quality and education of women
3. To make women's education technology-intensive
4. Development of Expression Ability and Teaching Skills
5. To provide direct and knowledge to women or to create opportunities
6. To make women active
7. To produce healthy vision of women
8. To bring innovation in teaching methods
9. To strengthen the social aspirations and the economic side
10. for technical and scientific knowledge in women

Importance of Innovation in Women's Education

1. by innovating teacher to remove boring and uninteresting teaching of girl child they are able to give joyful and interesting education.

Social Economic Development of Women through Innovation in Learning

2. It helps the teacher to adopt a creative, responsible attitude and practical approach towards their Work.
3. This women's field can develop new competencies by breaking the traditional educational inertia through innovation.
4. Through innovation education, women make themselves creative and studious.
5. Innovation can make the best use of the resources available to the school and the community in Education. Implication Innovation is necessary to keep the educational system and work system alive, in the absence of which there can be difference in women's educational goals and process, it will be used to meet the future expectations along with the present value. I am helpful. Community participation of women through innovation in education Innovative teaching technology, sports, education in simple and English learning, girl's parliament, all round development of art craft, education through concept mapping, painting, etc. will be used for their future life. I can do Innovative teaching leads to qualitative progress in education. Direction is obtained from education, which leads to the development of women, society and the nation. Therefore, the area of innovation importance in the education of women is accepted from the socioeconomic, political, cultural, and educational point of view.

CONCLUSION

- Innovation in learning and social, economic development of women empowerment are rarely discussed but each essential value for human progress.
- Recent women development in innovation thinking increasingly emphasize the opportunities that innovation can bring about to address development issues and spur wider social change. These concepts of innovating focus on advancing social and economic progress.
