A Study on Impact of Global Climate on Women

Tanvi Kohli^{1*}, Sonia Goel²

ABSTRACT

STRONG WOMEN=STRONG WORLD

‘Women are powerful and most dangerous’

Is it evolution or revolution? In our society women is such a sensitive world which is asking for evolution. We are living in era where transformation is required very fast. The higher vulnerability is not due to biological or physical differences but it is formed by social institutional and legal context. Women are considered left out part of society who doesn't play any role in growth. But if we talk about global climate effects on women it can be interpret as Gender equality, Eliminating sexual violence, Breaking stereotypes and Empowering. The interest of feminist studies do not lie only in the field of sex discrimination but knowing how to critically evaluate practices, beliefs and standards about gender that shape the opportunities for women they face in their daily lives and then to use these skills in a variety of careers in order to be a more successful leader in any organization. Modern women are behaving more like men. They are almost in every field where women are expected least.

*Responding Author

Meaning of women has been totally changed. Field of sports, education, MNC's , corporate sector, hotelier, chauffeur, body guard, police, army, navy , shops, business, doctor, advocate and yet many more they are nowhere less and proving themselves. If one wanted to provide a real explanation for changing feminine behaviour, what would this be? Why modern women behave more like men? To get the perspective of women I conducted a research on this and find out the answer by self-made questionnaire target age group 18-24 years girls.

Key words: *Gender equality, Eliminating sexual violence, Breaking stereotypes and Empowering.*

INTRODUCTION:

Since the beginning of world women are affected by our stereotype culture and society. Women are considered 'good for nothing'. Slowly with time women realised that we are not appreciated for anything and we are considered nothing in house, society and even world. They were taken for granted. What is global effect? Here global effect means when the world underestimates the women an evolution come and women drastically come in front for their rights. That is a global effect. Where world is in shock that those women who never kept a step out from home are now bigger achievers. Many women set an example in many fields. Is it evolution or revolution? It can be said some women evolve and some revolt. In our society women is such a sensitive world which is asking for evolution. We are living in era where transformation is required very fast. The higher vulnerability is not due to biological or physical differences but it is formed by social institutional and legal context. Women are considered left out part of society who doesn't play any role in growth. But if we talk about global climate effects on women it can be interpret as Gender equality, Eliminating sexual violence, Breaking stereotypes and Empowering. The interest of feminist studies do not lie only in

the field of sex discrimination but knowing in how to critically evaluate practices beliefs and standards about gender that shape the opportunities for women face in their daily lives and then to use these skills in a variety of careers in order to be a more successful leader in any organization. Modern women are behaving more like men. They are almost in every field where women are expected least. Meaning of women has been totally changed. Field of sports, education, MNC's , corporate sector, hotelier, chauffeur, body guard, police, army, navy , shops, business, doctor, advocate and yet many more they are nowhere less and proving themselves. In today's time disability is not a hurdle for an achievement of women. Some of women which overcome every barrier are:-

- **SudhaChandran**-She overcome her disability of amputee leg by getting a prosthetic “Jaipur Foot” and became one of the most popular and acclaimed classical dancers of the country.
- **Arunma Sinha**- She lost her leg when some robbers pushed her out of a moving train. Two years later, she became the first woman amputee to climb Mount Everest. She disliked the look of pity and sympathy in everyone's eyes and did not want to be looked upon as a handicapped person. She has proved that a strong determination and will is far more important than a strong body. Even with a prosthetic leg, she overcame her challenges and made history.
- **SadhnaDhand**- Suffering from brittle bone disease, 57-year-old Dhand lost her hearing at the age of 12 and stands 3.3 feet tall. But, this disability was not strong enough to stop her from pursuing her passion for painting, for which she has even won a national award. Apart from this, she has received many awards at the state and national level for painting and photography. She is now imparting this art to other students and conducts classes at her house. Not only this, she is an active social worker and donates to various organizations working with children with mental and physical disability.
- **Preethi Srinivasan**- She was the captain of the under-19 Tamil Nadu women's cricket team. Even after the

unfortunate swimming accident that left her paralyzed below the neck, she continues to inspire other lives through her organization Soul free. She has started to provide hope to women with severe disabilities and assists them in fulfilling their highest human potential by providing a basic quality of life.

These are few there are many who overcame there disability.

Objectives of the study

- To identify how many girls are restricted with the culture.
- To determine how many girls can be a part of change.
- To find out how many are breaking the barrier.
- To determine the opinion of women whether they are competing the men or not.
- To get the opinion for the change and what could it be.

METHODOLOGY

The study was based on global effect of climate on women and is a pilot study. The data required for the study have been collected with the self-made questionnaire by a direct survey. The sampling method adopted for the study of 25 questionnaires. The data collected was analysed and simple percentile method is used with yes or no answer.

Analysis

Self-Made Questionnaire

S.N	Questions	Percentile of Yes OR No	
		Yes	No
	Have you chosen your stream with your wish?	88% (22)	12% (3)
	Are you time bounded in evening?	48% (12)	52% (13)

S.N	Questions	Percentile of Yes OR No	
		Yes	No
	If you have to anticipate for orthodox culture would you be a part of it?	48% (12)	52% (13)
	Have you anticipate the decisions of your family, society or friends?	84% (21)	16% (4)
	Do you think you are capable enough to compete men?	100% (25)	0
	Do you think with time the society would be female dominating instead of men dominating?	76% (19)	24% (6)
	Are women coming in untouched field?	64% (16)	36% (9)
	If you get a chance to be part of revolution where women strongly revolt for there right would you support?	100% (25)	0
	Do you think a woman who is disable is shown positive attitude by society?	48% (12)	52% (13)
	Are they getting proper facilities for their disability?	20% (5)	80% (20)

REVIEW OF LITERATURE

Society is handicap by their opinion. Women are not handicap. A perspective of looking things is disabling. Still in our society freedom to women is not given, they are restricted with all possible barriers. They are always pressurised with family and society. We do say that we are an independent country but we all as an individual are slave of orthodox thinking. Life style may be modernise but thinking inside is same. Zeal of doing something is more in women. They are innovative, productive and upgraded. But not getting mental and financial support

obligate them. If we see the above mentioned women who are disable but their dedication of doing something was stronger than disability. It's all about our mind and our perspective of doing things. As we can see 100 percentile believes that there is no positive attitude of society towards disable and there is a lack of facilities for them. But they 100 percent strongly believe they can compete men. In some areas strong attention is required for women.

RESULT AND DISCUSSION

Findings

- Women have zeal of proving their potential but confused.
- Parent and society bounded.
- Have calibre but right path is not getting them or there are hurdles.
- Safety issues of women due to which they are barricade.

SUGGESTIONS

- **Moral Values** are necessary in life. Parents should impart moral values since childhood rather than imposing orthodox culture.
- Women has to do more work than men that's true because that is the law of nature but at the same time she has a right of freedom too.
- Young minds are faster and energetic so we should not barricade them by the rules and regulations.
- Let them take their own decisions. Yes we can suggest them but not saying direct 'NO' to them. That makes them think offensive and make them negative.
- Disability is not a curse, we should not make other person feel incomplete it's just that they are over blessed by God so that they can set an example for others.
- Facilities and positive attitude is required though there is facility for them but we need systemise things in our system which would help them to motivate themselves.

- Society and parent plays an important role in one's life so they should believe in women and encourage them for their decisions rather than criticizing.
- Guidance and counselling is also required for parent. As in today's life we are running in race without knowing our aim and goal and the same we are imposing on our child.

CONCLUSION

Many women broke the barricade and came ahead. They never stop from the hurdles in their life. They are motivated and focused. But still it can be concluded that there many girls and women who really want to do something in life but are restricted somehow. Among them many have broken the barricade and come ahead. Still our society needs to change their perspective regarding women. They should know that every individual have the right to freedom. When goals are set and focussed then no one can stop you to achieve your target. This is the basic things which need to improve rest would automatically get corrected.
